(Neb.)-Jetliner With Fuel Problem Emergency Lands In Omaha

By: Roxie Graham-Marski Posted at: 12/26/2012 09:47 AM

OMAHA, Neb. (AP) - More than 100 airline passengers have already left Omaha after their plane made an uneventful emergency landing on Christmas Day.

Southwest Airlines spokesman Paul Flanigan says a fuel valve problem prompted the crew of Flight 2879 to declare an emergency. The Boeing 737 was diverted to Omaha's Eppley Airfield and landed around 9:30 p.m. on Tuesday.

Flanigan says the plane landed without incident. It was carrying 109 passengers and five crew members from Denver to Kansas City International Airport.

He says the passengers boarded another plane and arrived in Kansas City, Mo., about two hours later than their original schedule.
